

# Insuring your captions are exported when exporting a catalog

It's really important that you describe your photo in the LIGHTROOM CAPTION field, and insure that you have your name in the COPYRIGHT field. In thinking about the CAPTION field, try to visualize a person 100 years from now looking at the photo. How would you describe it.

## **IMPORTANT:**

**To insure that your CAPTION is exported with you file, you must go to the EDIT menu and select CATALOG SETTINGS**

**NEXT, Select the METADATA tab and insure that the AUTOMATICALLY WRITE CHANGES TO XMP is checked. Without this checkmark, the captions and copyright will not be imported into the master catalog. We found this out the hard way.**
